

SHEET _____ OF _____

■ **ON HAND BY CALIBER AND LOAD** rounds only, no prices

How to use: count sealed boxes × rounds per box, then add loose rounds. Copy the lot number from the box flap so you can trace accuracy or a bad batch. **Min** is your restock point; **Target** is where you want to be. Before a class, check its round-count list against On hand. Log every range day on page 2.

SHEET _____ OF _____

[illegible]
